

IT ASSET DISPOSITION (ITAD)

While term ITAD is widely used, many business and IT leaders do not fully understand or appreciate the enterprise-level risks on non-compliance with the regulations and requirements of off-line data security. Aegis Solutions is fully certified in all aspects of e-waste recycling, data destruction, and data remediation. Our best-in-class staff and facilities are laser-focused on the proper disposition for retired IT assets.

- ✓ Industry leading ITAD program
- ✓ Adhere to all Federal and State mandates
- ✓ Guarantee 100% Certified Data remediation
- ✓ Provide full transparency through all phases of the engagement
- ✓ Deliver full inventory reporting, Chain of Custody documentation and Certificates of Destruction

PROGRAM OVERVIEW

Aegis Solutions IT Asset Disposition services provide the full spectrum of proper disposition for retired IT assets. Many organizations assume that when retired assets are removed from their facilities they are processed and decommissioned in accordance with both local and federal guidelines, however, the reality is that less than 30% of retired assets are handled properly.

Proper disposal encompasses many factors ranging from data security to identifiable reuse opportunities to proper recycling methodologies. Aegis Solutions has an industry-leading ITAD program that adheres to all Federal and State mandates, guarantees 100% Certified Data remediation and provides full transparency through all phases of the engagement with full Inventory reporting, Chain of Custody documentation and Certificates of Destruction.

CERTIFICATIONS AND COMPLIANCE

ABOUT AEGIS SOLUTIONS

Aegis Solutions was started with the goal of providing a single source for clients when it comes to full IT Asset Lifecycle Management. With the demand for faster, more reliable, cost efficient hardware the increasing advancements in technology is bringing new products to the marketplace at an unprecedented pace and with this, the acceleration in retiring of legacy hardware. By leveraging our 20+ years in the IT vertical, Aegis Solutions has recognized the ever changing landscape within IT Infrastructure and has built offerings to ensure that these changes are met with proven, secure, environmentally conscious solutions.
